

Amendments to the Specification:

Please replace the paragraph beginning on page 14, line 18 with the following amended paragraph:

A divider 62 may be formed in a manner that is relatively continuous with the outer seam 60 to separate the cushion 11 into the pelvic chamber 40 and the thoracic chamber 42. The divider 60 has an elongated portion 64 with an end 65 offset from the opposing portion of the outer seam 60. The end 64 65 may have a relatively carefully selected shape, with an insertion surface 66 and a resting surface 68, the function of which will be described subsequently.
